Achieving a 100% HTTP cache hit ratio

Eric Selin, web perf guy, founder of statichost.eu

HTTP caching does NOT really work for dynamic content

1. Cache invalidation is based on time (mainly)

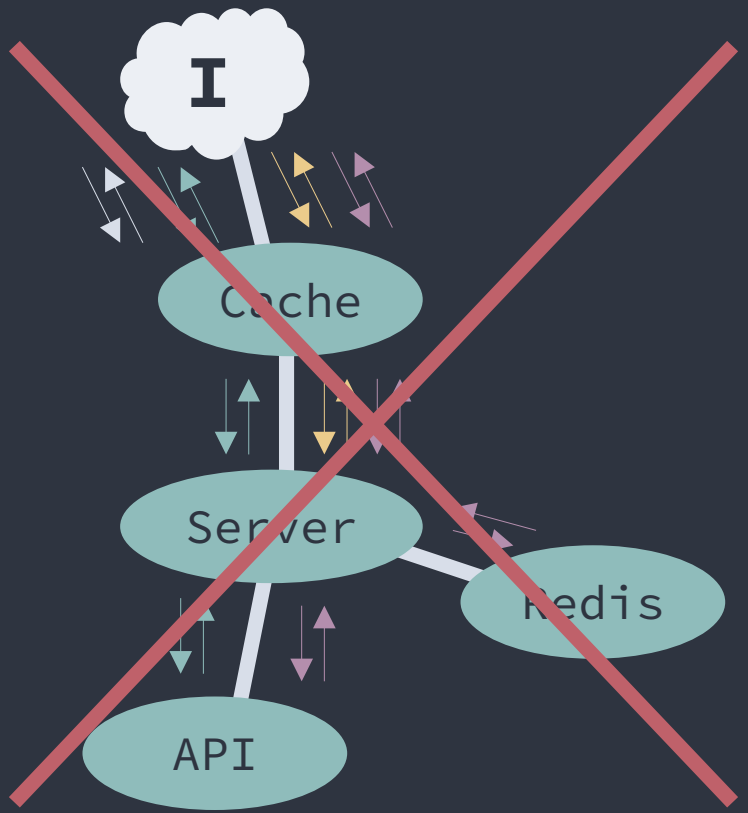
2. First request always requires a round-trip to the server

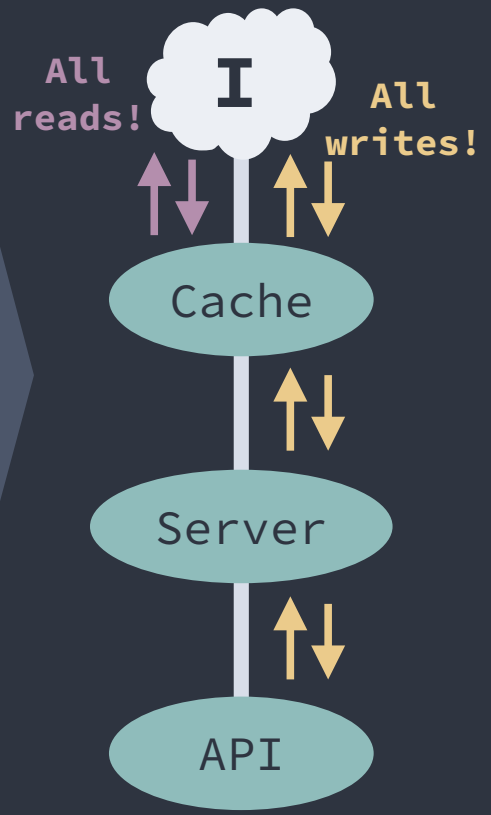
Eric Selin - eric@statichost.eu

OR?

Eric Selin - eric@statichost.eu

Reverse Proxy with automatic cache warming





Everything mananaged through HTTP response headers

Updates cached responses rather than invalidates them

(Soon)
Open Source Software!
